City of Lander

Press Release

The City of Lander appreciates the community support while the water issues, caused by the 2010 flood are being worked on.

The City of Lander is allowing water usage to most of the City. Conservation measures would be appreciated.

Unfortunately the following subdivisions are still affected with low pressure and are asked to continue water conservation:

Capitol Hill
Popo Agie Heights
Chevy Chase
Chevy Chase Second Addition
Prideax II
Jones Subdivision
South Lander Industrial Park
Highland Estates

The City of Lander asks that the citizens of these areas continue to conserve water by not watering lawns, not washing cars, not washing decks and/or driveways. Unfortunately the capitol hill area will continue to have pressure issues and water shortages until further notice.

The City of Lander will continue to update the community as things change. If you have any questions please contact City Hall, 307-332-2870.

For Release June 18, 2010
